CAREER OBJECTIVE

B.Tech Computer Science graduate (CGPA 8.69) from SR University, Warangal with hands-on Python backend development, AWS cloud deployment, and CI/CD automation experience through LifeRoute - a production application integrating third-party APIs for real-time decision workflows. Comfortable with Docker containerisation and cloud-based AI service integration concepts (AWS Lambda). Three AWS Academy certifications. Seeking Fresher GenAI DevOps Intern role at ARTPARK @ IISc to support AI infrastructure, CI/CD pipelines, and Docker-based deployment for cutting-edge research and applied AI projects.

TECHNICAL SKILLS

DevOps for AI Infrastructure: CI/CD pipelines (GitHub Actions), Docker containerisation for AI/ML workloads
Cloud & AI Services: AWS (EC2, S3, IAM, Lambda, CloudWatch) - deployment support for AI-driven applications
API Integration: Third-party and AI API integration experience (Google Maps API), transferable to GenAI/LLM API workflows
Scripting: Python, Bash - automation for deployment, monitoring, and data processing pipelines
Containerisation: Docker (Dockerfile, build, run, push) - packaging applications for consistent AI infrastructure deployment
Monitoring: CloudWatch - tracking infrastructure health and performance for AI-driven services
Linux & Networking: Ubuntu Linux, SSH, TCP/IP, VPC networking (Cisco CCNAv7)
Research-Oriented Mindset: Comfortable working independently on applied technical problems, strong documentation habits

PROJECTS

LifeRoute - AI-Adjacent DevOps: CI/CD, Docker, Cloud API Integration

Python | Flask | AWS EC2 | Lambda | Google Maps API | Docker | GitHub Actions | 2025

- Built a Python/Flask application integrating a real-time third-party API (Google Maps) into automated decision workflows - directly relevant to GenAI/LLM API integration patterns.
- Set up CI/CD pipeline with GitHub Actions to automate build, test, and deployment of the application, supporting rapid, reliable iteration cycles typical of applied research projects.
- Containerised the application using Docker, ensuring consistent deployment across development and production environments for AI-adjacent infrastructure.
- Used AWS Lambda for serverless event processing, applying cloud-native patterns relevant to scalable AI infrastructure deployment.
- Monitored infrastructure and application performance using CloudWatch, maintaining reliability for a system processing real-time data.
- Documented system architecture, API integration logic, and deployment procedures clearly to support reproducibility and knowledge transfer.

Medical Appointment Booking System

PHP | MySQL | Git | 2024

- Built full-stack application with structured data handling and API-based service integration, practicing clean documentation and reproducible development practices.

EDUCATION

B.Tech - Computer Science Engineering | CGPA: 8.69

SR University, Warangal, Telangana | 2022 - 2026

Diploma - Computer Engineering | 79%

VMR Polytechnic, Warangal | 2019 - 2022

CERTIFICATIONS

- AWS Academy Cloud Foundations - Amazon Web Services
- AWS Academy Web App Builder - Amazon Web Services
- AWS Academy Data Pipeline Builder - Amazon Web Services
- CCNAv7 Introduction to Networks - Cisco Networking Academy
- Cybersecurity Essentials - Cisco Networking Academy
