Warangal, Telangana-India

OBJECTIVE

Full-Stack Developer with hands-on experience building production-style MERN applications using React, Node.js, Express, MongoDB, Docker, and REST APIs. Strong foundation in Data Structures Algorithms with experience developing scalable backend systems and cloud-based applications. Seeking a Software Engineering Internship to contribute to high-performance engineering teams.

EDUCATION

- SR University** May 2023- May 2027(Expected)
Bachelor Of Technology in Computer Science Warangal,India
 - GPA: 8.65/10.0**Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
- SR Junior College** October 2021- April 2023
Pre-University Education Warangal,India

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript (Basic), C (Basic), C++ (Basic)
- Frontend:** HTML5, CSS3, React.js, Tailwind CSS, Vite
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- Databases:** MongoDB, MySQL, PostgreSQL
- Cloud & DevOps:** Docker, Git, GitHub
- Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- Tools:** Visual Studio Code, Postman

PROJECTS

- Loan Management System | Full-Stack Developer** December 2025 - march 2026
Tech Stack: MERN Stacks [Source Code](#)
 - Developed a production-ready MERN-based Loan Management System for managing members, loans, repayments, receipts, and financial transactions.
 - Designed and implemented secure REST APIs using Express.js and MongoDB to support end-to-end loan processing.
 - Built responsive React.js interfaces integrated with backend services for efficient customer and loan management.
 - Implemented JWT-based authentication and role-based authorization for secure access control.
 - Optimized MongoDB queries and backend APIs to improve application responsiveness and scalability.

EXPERIENCE

- AI/ML Intern [🌐]** July 2024 - September 2024
EduSkills — in collaboration with Google Developers Virtual
 - Built a customer sentiment classification model using Python, Scikit-learn, and NLTK, achieving 89% accuracy on test data.
 - Engineered a recommendation engine prototype for e-commerce, improving simulated click-through rate by 32%.
 - Validated model performance using confusion matrix and cross-validation techniques; documented insights for stakeholder review.
