

Mohammed Rizwan

Dear Hiring Manager,

I am excited to apply for the **Digital, AI and Innovation Internship (Global Call 2026)** at UNDP.

I recently completed my Bachelor's degree in Computer Science and have been building practical experience through cloud, web development, and software engineering projects. My primary interests are cloud computing, DevOps, digital products, and artificial intelligence that solve real-world problems.

Over the past year I have developed full-stack applications using React, Node.js, Express, MongoDB, Git, and REST APIs while continuously improving my AWS cloud knowledge. I enjoy designing scalable solutions, learning new technologies quickly, and solving challenging technical problems.

One project I am particularly proud of is **LifeRoute**, a smart emergency response platform designed to improve ambulance dispatch and hospital communication. Through this project I strengthened my experience in full-stack development, cloud deployment, APIs, and collaborative software engineering. I have also been building cloud-focused applications and continuously improving my understanding of DevOps practices, deployment automation, and system reliability.

What attracts me most to UNDP is the opportunity to apply technology for social impact. I believe digital innovation, artificial intelligence, and data-driven decision-making can improve public services and create meaningful change across communities. I am eager to contribute to the Digital, AI and Innovation Hub while learning from experts working on global development challenges.

I am a fast learner, adaptable, detail-oriented, and comfortable working independently in remote environments. I would be honored to contribute my technical skills while gaining valuable experience supporting UNDP's mission.

Thank you for your time and consideration. I look forward to the opportunity to contribute to your team.

Sincerely,

Mohammed Rizwan
